

Borrego Valley Groundwater Elevations for 2003

EXPLANATION

— 450' Line of equal elevation of groundwater in feet above mean sea level ; dashed where inferred

Fault
Intermittent stream
Well

Alluvium; water-bearing where saturated
Consolidated rock

Base map modified from USGS 7.5 minute topographic maps. Groundwater contours are a generalized representation of static water levels interpreted from 23 wells measured in Summer 2003. Water levels are interpreted to represent unconfined conditions.
